

On Saturday, Paula Stewart went shopping at Northland Mall during the Christmas sales. The chart below lists what she bought, how much each item cost, and how she paid.

Complete the chart by computing the discount price (if applicable), sales tax (6.25%), and cash price of each item. Also determine the total amount she spent. Round all answers to the nearest cent. The first one is done for you as an example.

Store	Item	Retail Price	% Discount	Discount Price	Sales Tax	Cash Price	Method
Foot Locker	Bulls Jacket	\$ 65.95	25.0%	\$ 49.46	\$ 3.09	\$ 52.55	Check
The Boutique	Nightgown	\$ 45.95	20.0%	_____	_____	_____	Check
Von Mauer's	Business Suit	\$340.00	25.0%	_____	_____	_____	Visa
McDonald's	Lunch	\$ 4.93		_____	_____	_____	Cash
Bergner's	Sweater	\$ 45.00	15.0%	_____	_____	_____	Visa
Yogurt Tyme	Yogurt	\$ 2.55		_____	_____	_____	Cash
Movie Theater	Movie	\$ 8.00		_____	_____	_____	Cash
<b>TOTAL</b>						_____	

$\$65.95 \times .25 = \$16.49$    
  $\$65.95 - \$16.49 = \$49.46$    
  $\$49.46 \times .0625 = \$3.09$    
  $\$49.46 + \$3.09 = \$52.55$
